

Briefing to ODIN Vendors

Vicki Pendergrass
Associate CIO for Programs
National Aeronautics and Space Administration
March 29, 2004

Mission—Office of the CIO (Code V)

MISSION

Demonstrate NASA leadership in the use of information technologies by:

- Providing the NASA workforce the information infrastructure and tools that adapt and evolve to support management, science, research, and technology programs
- Developing and implementing unique and specialized IT systems to support mission planning and operations
- Providing systems that disseminate information to the public and preserve NASA's information assets

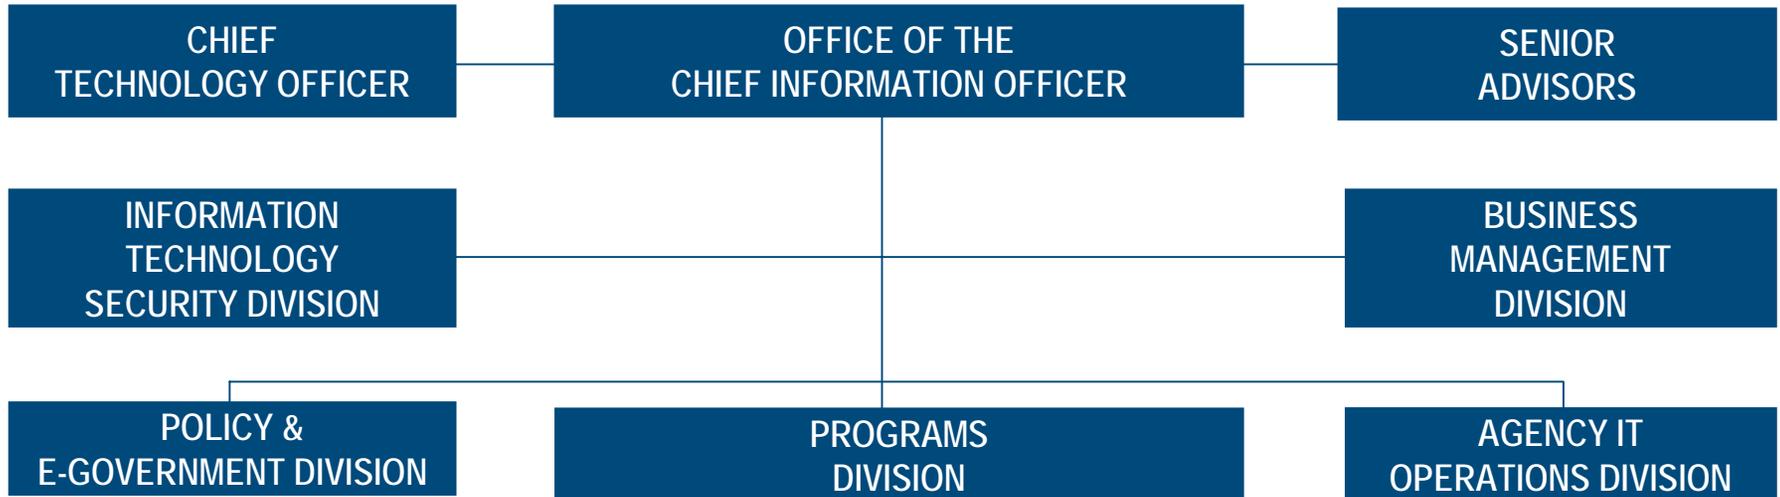

Major Functions—Office of the CIO (Code V)

- Develop and maintain the NASA Enterprise Architecture
- Establish effective investment control mechanisms for selecting, managing, operating, and evaluating results of all NASA IT investments
- Establish and enforce IT Security policies, protocols, and procedures to protect the Agency's information assets
- Manage NASA's financial management systems (joint responsibility with the CFO)
- Manage all E-Government initiatives for the Agency
- Advise the NASA Administrator and other senior management personnel on IT planning, acquisition, and management

Organization—Office of the CIO (Code V)

Support Requirements—Office of the CIO (Code V)

- **25-30 desktops total**
 - Mostly laptop/docking station configurations
 - Roughly 1/3 Mac, 2/3 PC
 - One Mac on guest network, several using OS X
 - One G5 graphics/publications setup
 - One PC on XP
 - About 1/3 with local printers
- **Remote access critical—several individuals telecommute one or more days each**
- **Small contractor support staff for business management, graphics/publications, and administrative support**
