

**Government-Industry Data Exchange Program (GIDEP)  
Initiation & Publication Process**

KDP-KSC-P-2103  
Rev.: A

**Objectives:**

- To meet requirements of [NPR 8735.1](#), [KNPR 8720.2](#), and [NPD 2110.1](#).
- To provide NASA with information on suspect non-conforming, improperly manufactured, counterfeit, or safety deficient parts, materials, software, or safety items.
- To generate and release appropriate GIDEP Notice/ NASA Advisories when problems or non-conformances are identified.

GIDEP is a cooperative information sharing program between the US and Canadian governments and industry participants. The goal of GIDEP is to ensure that information concerning problems involving parts, materials, software and safety is exchanged both internally and externally to NASA, and to provide a mechanism to ensure that appropriate parts, materials, software, and safety items are used.

**Note 1:** To identify, control, and make corrections for all problem/ nonconforming parts, materials, software, and safety items.

**Note 2:** Evaluate the need for the exchange of data when suspect nonconforming, improperly manufactured, counterfeit, or safety deficient parts, materials, software, or safety items are identified. Criteria for "data exchange":

- a. Data is of general interest to the GIDEP community.
- b. Data involving parts, materials, software, or safety items not used by anyone else or acquired for a specific use will not be exchanged.
- c. Data exchanged will not be classified or proprietary.

**Note 3:** Determination based on the GIDEP report criteria in the [GIDEP Requirements Guide](#), GIDEP SO300-BU-GYD-010.

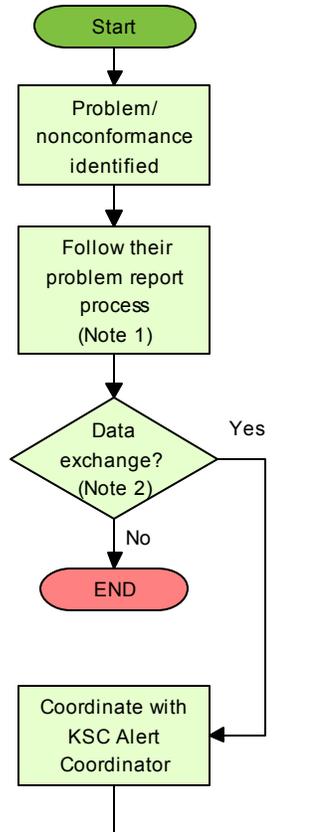

**Note 4:** In accordance with the [GIDEP Operations Manual](#), GIDEP SO300-BT-PRO-010.

**Note 5:** NASA Advisory System provides standardization for Advisories (<https://nasaforum.gidep.org/>).

**Note 6:** Forward a copy to HQ Deputy Assistant Inspector General.
